About Our Company

We're not just another warehouse. We provide low-cost space, a well-trained staff and access to distribution software that yields zero errors. Clients rely on Ferber Warehousing's Just-In-Time (JIT) distribution and the measurable cost savings achieved by utilizing our services.

We have over 35 years of experience, and our extensive technology enables us to provide a service that is timely, accurate and most importantly, cost-effective.

Products and Services

Warehouse Features: It takes more than just space to be an effective distribution center. We have the floor space required for bulk container processing and palletizing; inspecting, testing and processing returns; and consolidating, repackaging and/or kitting multi-item shipments. Our facility has been inspected and approved by the State of Michigan's Liquor Control Commission, the U.S. General Services Administration (GSA) and General Motors Corporation. We are located in the heart of the Midwest, in a suburb of Detroit, Michigan. Our central location is surrounded by 70% of the US population, resulting in favorable shipping rates.

Distribution Features: Our comprehensive distribution software is easy to access, easy to work with and reliable. It offers secure connections, real-time inventory, distribution data visibility, Electronic Data Interchange (EDI), File Transfer Protocol (FTP) transactions and ANX-based automotive processing. We provide all the data you need to support your daily operations as well as your clients. Our barcode-driven inventory control system insures speed and accuracy by identifying locations, creating the most efficient storage and retrieval positions, and verifies package content before shipping, resulting in zero errors. We fulfill your orders and process your returns based on this superior technology.

Employee Strengths: Our staff utilizes proven methods to insure that our technology and services meet all current standards and will exceed our client's expectations. Our in-house IT staff and our warehouse management team work together with our clients to integrate our process, which provides a seamless work environment for both companies. You can rely on us to eliminate distribution concerns and to handle all of your warehousing needs timely, accurately and cost-effectively.

Why Choose Us

Maintaining and operating a warehouse is expensive. We maximize your space by stacking your product as high as possible, using technology to locate each pallet, individual box or serial-numbered part. Each month, you will pay only for the square footage you're using or services you requested. Our technology places us in the unique position to offer your company a total distribution system, at measurable cost savings, allowing you the flexibility to stay on top of your business. Our clients rely on us to receive, store and ship large volumes of goods timely and with zero errors. Stop in for a tour anytime or for further details, visit our Web site at www.ferberwarehousing.com.
